Important considerations:

- 4 year colleges and universities will typically view students taking the Algebra/Geometry/AMS I sequence as having had 2.5 years of high school math. They typically expect students to complete math through AMS II or Advanced Algebra.
- The above are guidelines. While these academic considerations remain the primary factor in admissions, all University of Wisconsin schools conduct a comprehensive, holistic view of applicants, including non-academic factors such as essays, letters of recommendation (if submitted), co-curricular activities and socio-economic factors.
- For schools with Rolling Admission, early application is encouraged. Applications will be accepted until the freshman class fills.
- The following 4 year University of Wisconsin universities now have more than one campus:
 - UW Eau Claire
 - UW Green Bay
 - UW Milwaukee
 - UW Oshkosh
 - UW Platteville
 - UW Stevens Point
 - UW Whitewater
